

Re: DEPARTMENTAL RESEARCH REPORT
From: **Philip Smith (Chair, Research Committee)**
To: Academic Staff
Date: December 2006

Memorandum 4: VERIFICATION CRITERIA AND REQUIRED PROOFS

Purpose of Verification:

The existence and proper categorisation of all publications entered into the Department's Research Report as 'Type-1' categories has to be proven. The University's Melbourne Research & Innovation Office (MRIO) has provided very comprehensive guidelines, which are based on requirements by DEST. The main points regarding verification are summarised below. In case you need more information, the full Classification Guidelines (too large to be copied for everyone) is available from :

<http://www.research.unimelb.edu.au/rpag/datacollection/publications/index.html>

Auditing:

There will be three audits: Internally by me as the DRR Convener, before submission to the MRIO; then by UoM Library; then by an external company (organized by the AVCC).

General criteria for publications:

- *Year of publication:* The year of publication, ie. the copyright year, must fall within the calendar year of the collection and the year must appear within the publication.
- *Authentic publication:* An item must actually be published by a journal or publisher accepted by DEST. (The criteria for publishing vary between categories).
- *Authors' affiliation with the University of Melbourne:* To count, the author must have been a staff member or student of the University when the research leading to the publication was carried out and written up. To prove the authors' affiliation the publication must have a by-line which identifies the University; or if there is no such by-line, an author's certification form is to be used (please contact Ann Dawson for further instructions).
- *Genuine research activity:* The essential characteristics of research activity is that it is original and leads to publicly verifiable outcomes which are open to peer appraisal. This includes four core types: pure basic research, strategic basic research, applied research, experimental development.

Note that many academic activities are not accepted in this regard, e.g. work related to teaching, testing, programming, literary work, bibliographies etc., because they are not primary research).

Please be aware that the MRIO verification requests are very important. For A1/B1/C1/F1 publications, we will need to *remove* any publication from our DRR which is not convincingly verified before submitting it to the MRIO. If you are not sure about the status of your publication, please consult the manual (copies available) or check the respective websites.

Specific verification requirements per publication type:

See the list provided in Form 1 (attached to Memo #2).

A list of DEST-accepted publishers and journals can be found on the website:

http://www.research.unimelb.edu.au/rpag/datacollection/publications/journals_publishers/index.html

If there is a refereed journal which is not listed but you can provide proof of the refereeing process, please contact Ann Dawson as soon as possible about this, and she will try to get it accepted.

LIST OF JOURNALS WHICH ARE ACCEPTED BY MRIO/DEST AS "C1"

{PARTIAL LIST ONLY}

Academic psychiatry
Accident analysis and prevention
ACHPER healthy lifestyles journal
Acta psychiatrica scandinavica
Acta psychologica
Acta Sociologica
